Note:

- √ Working very well.
 - When adjusted to the high brightness range: slight flickering (Compatible).
 - × Frequently flickering (Incompatible).
 - ×× Incompatible.
- (1-8) The first number after the check mark is a minimum number of lamps per dimmer;
the second number after the check mark is a maximum number of lamps per dimmer.

Please Note:

- The recommended list is based upon testing conducted by the manufacturer in a lab simulated environment, and the results can vary in certain field applications due to a number of factors.
- The absence of a dimmer from this chart does not necessarily imply incompatibility.
- Please reference the dimmer manufacturer's instructions for installation.

Application Notes

- In situations where there are multiple dimming circuits sharing the same breaker feed, ELV dimmers should be used.
