### Note :

- √ Working very well.
- When adjusted to the high brightness range: slight flickering (Compatible).
- × Frequently flickering ( Incompatible ).
- ×× Incompatible.

#### Please Note:

- The recommended list is based upon testing conducted by the manufacturer in a lab simulated environment, and the results can vary in certain field applications due to a number of factors.
- The absence of a dimmer from this chart does not necessarily imply incompatibility.
- Please reference the dimmer manufacturer s instructions for installation.

#### Application Notes

- In situations where there are multiple dimming circuits sharing the same breaker feed, ELV dimmers should be used.
